

The way for tomorrow's vehicle

PRESS RELEASE – 15 October 2020

The European Training & Simulation Association (ETSA) and The Driving Simulation Association (DSA) sign a Strategic Associate membership agreement.

ETSA and DSA are very pleased to announce the joint signature of a Strategic Associate Membership Agreement.

The agreement sees the continued expansion and diversion of ETSA's membership, supporting the growth in mutual networking opportunities and ETSA's mission to promote Modelling, Simulation & Training (MS&T) Industries in Europe.

The purpose of DSA is to promote and encourage driving simulation in all its aspects including, research, developments, applications and products, to facilitate communications between people involved or interested in driving simulation and to contribute to the organization of scientific conferences in the area of driving simulation including the well-known Driving Simulation Conference (DSC) Europe VR.

With this partnership, DSA will enhance its communications and share the latest news and innovations in the driving simulation fields with a wider community.
